

Associate Solutions Architect, IT Services

Job ID: 10560154 | AWS India - Karnataka

Description

- Do you like helping customers solve technical problems?
- Would you like to do this using the latest cloud computing technologies?
- Do you have a knack for helping companies understand Emerging Technology Domains such as GenAI, Agentic AI, Analytics , Microservices architectures including the integration approaches?
- Do you thrive on rolling up your sleeves , a Builder who can help Architect new and emerging technologies along with been consultative to ensure success?
- Do you want to be part of the Retail / CPG team helping to establish Amazon Web Services as a leading technology platform for some of the largest Brands & Customers in India.

AWS Global Sales drives adoption of the AWS cloud worldwide, enabling customers of all sizes to innovate and expand in the cloud. Our team empowers every customer to grow by providing tailored service, unmatched technology, and consistent support. We dive deep to understand each customer's unique challenges, then craft innovative solutions that accelerate their success. This customer-first approach is how we built the world's most adopted cloud. Join us and help us grow.

As a Solution Architect, you will have the opportunity to help shape and deliver on a strategy to build mind share and broad use of Amazon's utility computing web services within strategic accounts and partners. Your broad responsibilities will include: owning the technical engagement and ultimate success around specific implementation projects, and developing a deep expertise in the Amazon Web Services technologies as well as broad know-how around how applications and services are constructed using the Amazon Web Services platform.

The ideal candidate will possess customer-facing skills that will allow him/her to represent AISPL well within a customer's environment and drive discussions with senior personnel within the company, as well as a technical background that enables him/her to easily interact and give guidance to software developers and architects. He/she should also have a demonstrated ability to think strategically about business, product, and technical challenges.

Roles & Responsibilities

- Serve as a key technical member of the Retail/CPG Account team in helping to ensure customer success in building applications and services on the Amazon Web Services platform.
- Scope each customer engagement, with attention towards clear and well-defined objectives and success criteria.
- Own each technical engagement, and help ensure a timely and successful delivery of value. (delivery of actual solutions to be done by Amazon Web Services partners)
- Capture and share best-practice knowledge amongst the solution architect community.
- Understand the Amazon Web Services market segments, customer base, and industry verticals.

Key job responsibilities

This role is within the Retail/CPG team in Amazon Web Services India (AWS India) and based out of Delhi

- As a Solutions Architect, you'll help your customers plan their successful cloud journey leveraging emerging technologies like GenAI to achieve business outcomes. You'll solve complex, technical challenges so your customers can focus on their business. This includes using your knowledge to craft scalable, flexible, and resilient cloud architectures. You'll drive or take part in technical solutions discussions, diving deep into the details with customer teams.
- Building relationships to understand our customers and partners is key. As a trusted technical advisor, you'll use your interpersonal skills to influence a variety of stakeholders from technical teams to executives. You'll help ensure their short-term technology decisions are aligned with their long-term goals. Speeding up the adoption of our services will be part of your day to day.
- You'll also act as thought leader in the wider community. This includes taking part in educating, sharing best practices, presenting at events, writing white papers, blogs, and running workshops. You won't just be part of an industry movement; you'll be leading it.
- As a customer obsessed advisor, you'll also have the chance to shape the direction of our products and services. This is through gathering feedback from customers whilst collaborating with our engineering and service teams.

To be successful in this role you need to be passionate builder with genuine curiosity about how technology can support your customers' business models and objectives.

Want to find out what it's like to be a Solution Architect at AWS? Watch this video (<https://bit.ly/3keYcC9>).

A day in the life

The Solutions Architect team at AWS is responsible for helping customers successfully implement cloud technologies. In a typical week you will meet multiple customers, and you will collaborate with them on designing and operating well-architected solutions. You will earn their trust and show them the art of the possible, educating them around the capabilities of AWS. Partnering with internal teams and experts, leveraging a deep knowledge of our tools and products, you'll craft highly scalable, flexible, and resilient cloud architectures that address our customers' business problems. As part of our team, you'll have the opportunity to continuously learn and innovate daily.

About the team

Retail/CPG Solutions Architects work hand in hand with AWS customers to help drive AWS services adoption. They are at the crossroads of business and technology and engage with customers of different stages. Supporting the overall technical relationship between customers and AWS, they work to understand the customer's business needs and give prescriptive guidance on how to create business value with technology. Solutions Architects also have broader impact at scale, taking a supporting role in creating and presenting technical content and best practices.

You will be part of a team that is responsible for driving adoption of AWS technologies while bringing differentiated value to customers. This is a team dedicated to some of the largest Brands/Services/Ecommerce customers in India . This customers follow unique technology adoption patterns and growth trajectories that distinguish them from traditional businesses, so you will be employing engagement strategies and programs tailored to their business needs and technical preferences.

Diverse Experiences

AWS values diverse experiences. Even if you do not meet all of the preferred qualifications and skills listed in the job description, we encourage candidates to apply. If your career is just starting, hasn't followed a traditional path, or includes alternative experiences, don't let it stop you from applying.

Why AWS?

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud platform. We pioneered cloud computing and never stopped innovating — that's why customers from the most successful startups to Global 500 companies trust our robust suite of products and services to power their businesses.

Inclusive Team Culture

AWS values curiosity and connection. Our employee-led and company-sponsored affinity groups promote inclusion and empower our people to take pride in what makes us unique. Our inclusion events foster stronger, more collaborative teams. Our continual innovation is fueled by the bold ideas, fresh perspectives, and passionate voices our teams bring to everything we do.

Mentorship & Career Growth

We're continuously raising our performance bar as we strive to become Earth's Best Employer. That's why you'll find endless knowledge-sharing, mentorship and other career-advancing resources here to help you develop into a better-rounded professional.

Work/Life Balance

We value work-life harmony. Achieving success at work should never come at the expense of sacrifices at home, which is why we strive for flexibility as part of our working culture. When we feel supported in the workplace and at home, there's nothing we can't achieve.

Basic Qualifications

- Experience with one of the following programming languages: Python, Ruby, Node.js, C#, or C++
- Experience with two or more of the following: networking fundamentals, security, storage or databases (relational or NoSQL), operating systems (Unix, Linux, or Windows)

Preferred Qualifications

- Experience implementing a cloud-based technology solution
- Experience in any of the following: Cloud Architecture, Systems Design, Software Development, Infrastructure Architecture, Data Engineering or DevOps

Our inclusive culture empowers Amazonians to deliver the best results for our customers. If you have a disability and need a workplace accommodation or adjustment during the application and hiring process, including support for the interview or onboarding process, please visit
