PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate and final-year B.Tech (CSE) student who designs and builds scalable, resilient and secure cloud architectures on AWS following Well-Architected principles. Hands-on across three-tier, serverless and CI/CD-driven solutions, including Infrastructure as Code with Terraform and a Python-based serverless ATS analyzer, with working knowledge of Linux, networking, security (IAM) and SQL/NoSQL databases. Customer-obsessed builder seeking a Solutions Architect / Associate Solutions Architect role.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (SAA-C03)** – Amazon Web Services | September 2026
- **AWS Certified Cloud Practitioner (CLF-C02)** – Amazon Web Services | May 2026
- **Oracle Cloud Infrastructure Certified Foundations Associate** – Oracle | October 2025

TECHNICAL SKILLS

AWS Compute & Serverless: EC2, Auto Scaling, Lambda, API Gateway

AWS Storage & Databases: S3, RDS, DynamoDB (relational and NoSQL)

AWS Networking & Delivery: VPC (public/private subnets), Elastic Load Balancing, CloudFront, Security Groups

Security & Integration: IAM (least-privilege roles and policies), SNS, CloudWatch

DevOps & Tools: Terraform (Infrastructure as Code), GitHub Actions (CI/CD), Git, Bash scripting, Linux

Programming: Python, Java (fundamentals), SQL

PROJECTS

Cloud-Based ATS Resume Analyzer (Serverless AWS Architecture)

Python | AWS

Python, S3, Lambda, DynamoDB, IAM, CloudWatch, Terraform, GitHub Actions, Discord API

- Built an ATS analyzer that compares multiple resumes against a JD and generates ATS scores, skill gaps and improvement suggestions.
- Designed a serverless architecture using S3, Lambda, DynamoDB, IAM and CloudWatch, with Terraform and GitHub Actions CI/CD for repeatable deployment.
- Created a Discord interface to upload a JD and resumes and view ranked ATS results from any device.

Highly Available & Scalable Three-Tier Notes Sharing Application

AWS

EC2, RDS, VPC, Elastic Load Balancer, Auto Scaling, Security Groups, IAM

- Designed a three-tier notes-sharing architecture (frontend, backend, database) across public and private subnets for network isolation.
- Configured an Application Load Balancer and Auto Scaling to improve availability and absorb changing workloads.
- Secured access with Security Groups and IAM roles following least-privilege principles.

Highly Available Serverless Web Application

AWS

CloudFront, S3, API Gateway, Lambda, DynamoDB, IAM

- Designed a serverless architecture using CloudFront and S3 for delivery, API Gateway and Lambda for the backend, and DynamoDB for storage.
- Secured resources with scoped IAM roles and policies.

Serverless Event Notification System

AWS

Lambda, API Gateway, S3, SNS, IAM

- Built a serverless event announcement system using API Gateway, Lambda and S3, with automated email notifications via Amazon SNS.
- Applied least-privilege IAM roles and policies across all resources.

Static Website Hosting with S3 and CloudFront (CI/CD)

AWS

S3, CloudFront, IAM, GitHub Actions

- Deployed a static website on S3 behind CloudFront, with S3 access restricted to CloudFront only.
- Automated deployments with GitHub Actions and secured the workflow with IAM policies.

EDUCATION

Mother Theresa Institute of Engineering and Technology

Expected April 2027

B.Tech, Computer Science and Engineering | GPA: 8.3 / 10

ACCOMPLISHMENTS

- Google Cloud Arcade 2024 – Champions Milestone Recognition, for completing cloud learning challenges and labs.
